

Customized CNC Stamping Parts Copper Polishing Zinc Plating

Our Product Introduction

for more products please visit us on precision-cncparts.com

Basic Information

- Place of Origin: guangdonghuizhou
- Brand Name: ywy
- Model Number: ywy123
- Minimum Order Quantity: 1 Perch/Perches
- Price: USD 3.88-32.88 1 Perch/Perches
- Packaging Details: Carton packaging and blister box
- Delivery Time: 10-15work days
- Payment Terms: L/C D/A D/P T/T Western Union MoneyGram
- Supply Ability: 1000 Perch/Perches 10-15work days

Product Specification

- Color: Customized
- Material: Stainless Steel, Carbon Steel, Aluminum, Copper, Brass, Etc.
- Sample: Available
- Packaging: Carton, Wooden Case, Pallet, Etc.
- Processing Method: CNC Stamping
- Surface Treatment: Polishing, Zinc Plating, Nickel Plating, Chrome Plating, Anodizing, Etc.
- Shape: Customized
- Tolerance: $\pm 0.01\text{mm}$
- Highlight: Zinc Plating CNC Stamping Parts, Copper CNC Stamping Parts

Product Description

Product Description:

CNC Stamping Parts are metal forming processes which use a Computer Numeric Control (CNC) Stamping machine and a range of metal stamping processes to produce complex and intricate parts and components. The CNC Stamping Parts are available in a range of materials including stainless steel, carbon steel, aluminum, copper, brass and other metals. OEM/ODM orders are accepted and the parts can be packaged in cartons, wooden cases, pallets and other packaging for secure shipping. The CNC Stamping process is a precise and reliable metal forming method which offers highly accurate parts with tight tolerances.

The CNC Stamping Parts offer superior mechanical properties, excellent surface finish and are designed to meet the exact requirements of the customer. The CNC Stamping process is a cost-effective method for producing complex parts with high precision and repeatability. The CNC Stamping process allows for precise control over the shape, size and complexity of the part, enabling the production of complex components with tight tolerances. The CNC Stamping process is a fast and efficient way to produce parts with high quality and consistency.

The CNC Stamping Parts are ideal for a wide range of applications including automotive, industrial, medical, aerospace and other industries. The CNC Stamping process offers high precision and repeatability for producing complex parts with tight tolerances. The CNC Stamping process is a cost-effective, efficient and reliable metal forming method which produces parts with superior mechanical properties and excellent surface finish.

Features:

Product Name: CNC Stamping Parts

Shape: Customized

Tolerance: $\pm 0.01\text{mm}$

Processing Method: CNC Stamping

CNC Stamping Machines: Metal Stamping Services, Metal Stamping Processes

Sample: Available

Color: Customized

Technical Parameters:

Tolerance	$\pm 0.01\text{mm}$
OEM/ODM	Acceptable
MOQ	1000pcs
Surface Treatment	Polishing, Zinc Plating, Nickel Plating, Chrome Plating, Anodizing, etc.
Material	Stainless Steel, Carbon Steel, Aluminum, Copper, Brass, etc.
Color	Customized
Sample	Available
Application	Automotive, Electrical, Electronic, Industrial, etc.
Processing Method	CNC Stamping
Size	Customized
Metal Forming Processes	Stamped Metal Parts, Stamping Presses, Stamping Dies, CNC Machining

Applications:

ywy cnc606 CNC Stamping Parts are extensively used in a variety of industries, such as automotive, electrical, electronic, industrial and more. With precision sheet metal parts, metal stamping services and CNC stamping machines, our CNC Stamping Parts are made of high-quality stainless steel, carbon steel, aluminum, copper, brass and other materials, and can be customized in size, shape, color and other specifications.

CNC Stamping Parts can be used in various applications, such as automotive, electrical, electronic, industrial, etc. With remarkable accuracy and repeatability, our CNC Stamping Parts provide reliable performance and long-lasting durability. The parts are well packed in cartons, wooden cases, pallets or other customized packages to ensure safe and secure shipping.

Whether you need a small batch of precision sheet metal parts or a large quantity of metal stamping services, ywy cnc606 CNC Stamping Parts are your ideal choice. If you need a sample of our products, we can provide it for you.

Packing and Shipping:

CNC Stamping Parts' Packaging and Shipping:

The CNC Stamping Parts will be individually bubble wrapped in a plastic bag.

The parts will be placed in a cardboard box.
The box will be sealed with tape.
The box will be labeled with the customer's name and address.
The box will be shipped via ground or air, depending on the customer's preference.

FAQ:

Q: What is CNC Stamping Parts?

A: CNC Stamping Parts is a manufacturing process where parts are formed from metal sheets through a combination of stamping, cutting, and punching. The process is often used to create components for automotive, aerospace, and electronic industries.

Q: What is the brand of CNC Stamping Parts?

A: The brand of CNC Stamping Parts is ywy.

Q: What is the model number of CNC Stamping Parts?

A: The model number of CNC Stamping Parts is cnc606.

Q: Where is CNC Stamping Parts made?

A: CNC Stamping Parts is made in Guangdong, Huizhou.

Q: What are the benefits of using CNC Stamping Parts?

A: CNC Stamping Parts offers many benefits, including increased accuracy, faster production times, and improved quality control. Additionally, this process is relatively cost-effective and provides a high degree of repeatability.
